PROFESSIONAL SUMMARY

Generative AI Engineer with hands-on experience designing and deploying **responsible-first AI platforms**, **LLM-powered applications**, and **RAG pipelines** on **Microsoft Azure**. Full-stack delivery capability spanning **React / TypeScript** frontends and **Python / Django / FastAPI** backends integrated with **Azure OpenAI**, **Azure Functions**, and **prompt engineering** workflows including model **fine-tuning**. Currently building AI safety, compliance, and licensing systems at a Station F Paris startup; previously shipped production Azure data pipelines at a smart-mobility scale-up.

TECHNICAL SKILLS

AI / GenAI	OpenAI GPT-4o · Azure OpenAI · Prompt Engineering · RAG · LangChain · Hugging Face · FAISS · Vector Databases · Fine-tuning · Responsible AI
Backend	Python · Django · FastAPI · Azure Functions · REST APIs · SQL / MySQL · Bash
Frontend	React / Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3
Cloud & DevOps	Microsoft Azure · Azure Blob Storage · Azure Storage · Azure ML Studio · Azure DevOps · Databricks · Docker · Git / GitHub
ML & Data	PyTorch · TensorFlow · scikit-learn · PySpark · Pandas · NLP · Computer Vision
Tools	Visual Studio 2022 · VS Code · PyCharm · JupyterLab · Linux

PROFESSIONAL EXPERIENCE

Founding AI Engineer & Architect | **Siloett.AI — AI Safety & Compliance Startup @ Station F** *Jan 2025 – Present • Paris, France*

- Architected and built an **end-to-end Generative AI platform** from zero — LLM orchestration, **RAG pipelines**, and a production **React / TypeScript** frontend with **Python (FastAPI)** and **Azure Functions** serverless backend.
- Designed and implemented **responsible-AI validation layers** including content-safety filters, bias-detection checks, and compliance guardrails ensuring all AI-generated outputs meet regulatory and ethical standards.
- Built **AI safety and IP compliance systems** including audit logging, provenance tracking, and output attribution pipelines — ensuring traceable and accountable AI output lifecycles.
- Developed **prompt-engineering** and **LLM evaluation frameworks** using **Azure OpenAI GPT-4o** and **LangChain**, with systematic fine-tuning to optimise domain accuracy across compliance use cases.

Data Scientist & Cloud Data Engineer | **Floware — Smart Mobility Startup @ X Innovation Center** *Jul 2024 – Jan 2025 • Massy, France*

- Designed and deployed end-to-end **Azure data pipelines** ingesting Bluetooth, computer-vision, and geospatial datasets into **Azure Blob Storage** for a real-time smart-city analytics platform.
- Built **forecasting and anomaly-detection models** surfacing mobility patterns, congestion metrics, and data-driven urban-planning insights for city-authority stakeholders.
- Improved data-processing efficiency by **35%** and reduced Azure cloud costs by **20%** through batch-architecture optimisation on **Azure ML Studio** and **Databricks**.
- Delivered production-ready pipelines in cross-functional Agile sprints tracked via **Azure DevOps**.

KEY PROJECTS

GreenLens — Cloud Carbon Intelligence *ASP.NET Core 8 • Angular 17 • Azure AI Search • Azure OpenAI • Docker • SQLite • Playwright* *2025*

- Designed and built an end-to-end **CO_2e estimation platform** with **Clean Architecture**, enabling per-resource carbon breakdowns for Azure infrastructure to support EU CSRD Scope 3 reporting compliance (effective 2026).
- Integrated **Azure AI Search** for semantic emission factor lookup across 50+ factors and **Azure OpenAI GPT-4o-mini** for AI-generated reduction strategies with 1-hour in-memory caching.
- Achieved **88 automated tests** across unit, integration, and E2E layers (xUnit, Jasmine/Karma, Playwright); deployed as a

single deployable unit on **Azure App Service**.

SafeGen — Responsible AI Compliance API *Azure Functions • Azure OpenAI • RAG • FAISS • Python • React • TypeScript* *2025*

- Built a serverless compliance-validation pipeline on **Azure Functions** that intercepts **Azure OpenAI** responses and evaluates them against configurable safety, bias, and regulatory rules before serving to end users.
- Developed a **React / TypeScript** monitoring dashboard displaying real-time compliance metrics, flagged outputs, and audit trails stored in **Azure Blob Storage**.
- Implemented **RAG**-based rule retrieval using **FAISS** and domain-specific compliance documents, enabling dynamic policy enforcement without redeployment.

VaxEvidence — Real-World Evidence Regulatory Platform *Next.js • React 19 • TypeScript • Supabase • REST APIs • Compliance* *2025*

- Built a **full-stack regulatory compliance platform** for vaccine research — protocol builder with PICO framework, evidence library with **PubMed / ClinicalTrials.gov** API integration, and collaborative review workflows targeting **FDA/EMA** compliance.
- Developed **React 19 / TypeScript** frontend with 56+ reusable UI components and a **REST API** backend handling document exports (PDF/Word), bibliography generation, and dataset management.

DocuQuery — AI-Powered Resume & Job Match Analyser *Next.js • FastAPI • Python • TypeScript • PostgreSQL • OpenAI* *2025*

- Built an **AI-powered resume–job match analysis** platform using **OpenAI GPT-4o** and a **FastAPI** backend — users upload a resume and job description to receive a **detailed compatibility score** with category breakdowns across skills, experience, education, and keywords in under 30 seconds.
- Implemented **missing keyword identification** and **prioritised improvement recommendations**, surfacing actionable gaps between candidate profiles and job requirements via structured LLM output parsing.
- Developed a **Next.js / TypeScript** frontend with a real-time results dashboard and built a **PostgreSQL**-backed REST API handling resume parsing, session management, and score history.

EDUCATION

M.Sc. Data Science & Network Intelligence *Sep 2023 – Dec 2024*
Télécom SudParis — Institut Polytechnique de Paris Paris, France
Relevant modules: NLP • Computer Vision • Cloud Computing • Data Structures • Linear Algebra • Project Management

M.Sc. Data Science & Artificial Intelligence *Aug 2022 – Dec 2024*
Asian Institute of Technology Bangkok, Thailand
Dual-degree programme with Télécom SudParis — Institut Polytechnique de Paris

B.A. Social Science Studies *Sep 2016 – Dec 2020*
Myanmar Institute of Theology Yangon, Myanmar

LANGUAGES

English — Professional working proficiency
French — Beginner (A1–A2, daily conversational use in Paris)
Burmese — Native
Japanese — Conversational
